Introduction

Well the summer is most certainly here and it's sweltering in my office; however, I am looking forward to celebrating the Queen's Diamond Jubilee in a couple of weeks when I can take a few days off and I wish you a superb time celebrating too.

I am very pleased to announce that The Finial has two new members, however, they are rather young as both were born in April! The first birth, Max Peter, born Sunday 22^{nd} , weighing in 6Lbs 9oz and belongs to member Eleni Bide of The Goldsmiths' Hall. The second birth, two days later, is a beautiful girl, Anastasia, whose mother Ekaterina Morrical is a relatively new member who thoroughly enjoys the search for interesting spoons. Congratulations to the parents and we will look forward to seeing pictures of the tiny tots with their first silver spoon held tightly, ready to use.

Again in the postal auction we have some wonderful and very rare lots, such as the set of 12 naturalistic teaspoons with matching mote spoon and sugar nips, it's quite amazing to think how this set has stayed together all this time, but that of course this is what makes it rare. Something that I am not so happy with is that I have to increase the postal charge for lots bought and returned within the auction. I didn't increase at last year's price increase, but now need to, but not by much, just £1.50 per parcel, making postage and packing £7.50 and for overseas postage will be £15.00.

Best regards, Daniel.

Cutlery-Throwing PM Might Have To Fork Out For A Better <u>Mouser</u>

(*Taken from The Telegraph, 14th November 2011, article by Robert Winnett*)

DAVID CAMERON has had to resort to throwing cutlery at the mice which have become an increasing problem in Downing Street, it emerged yesterday. During a dinner with Cabinet ministers last week, **the Prime Minister threw a silver fork** at a mouse seen scurrying across the floor. The incident came amid reports that a cat brought in by Downing Street aides to hunt the mice has proved something of an embarrassment, Larry is said to spend most of his time sleeping and conducting a relationship with his new female companion.

He is said to have caught only one mouse over the past few months. Last Monday night, Mr Cameron had invited lain Duncan Smith, the Work and Pensions Secretary, and Owen Patterson, the Northern Ireland Secretary, to his Downing Street flat to discuss the situation in Europe. Both of his guests are well-known Eurosceptics who considered resigning after being ordered to vote against holding a referendum on Britain's relationship with Europe.

During what was expected to be a tense dinner, the mood was lightened by the appearance of the mouse. "Where's Larry when you need him?" Mr Duncan Smith was said to have joked. The Prime Minister's attempt to slay the mouse with a fork failed. Larry was brought to Downing Street to catch rodents but shot to fame because, despite winning the affections of David and Samantha Cameron, he did not catch a single mouse or rat in two months. According to Mr Cameron, when they got Larry from Battersea Dogs & Cats Home the cat had been "highly recommended" and had a "very strong predatory drive and high chase-drive and hunting instinct", which he had developed during his time on the streets.

A West-Country Goldsmith Of The 16th Century

New Information Emerges

By Timothy Kent, F.S.A.

My archives contain more than a thousand names of West Country goldsmiths, many of them spoonmakers. Entries sometimes run to several pages, with ascribed marks, while others are 'one-liners' and mostly destined to remain so.

The Exeter list of Freemen records the admission, on 27th September 1573, of '*Nicholas Reeve*, *apprentice of John Jones*, *goldsmith*'. This was a prestigious apprenticeship, as Jones was a prominent provincial workshop owner, on record as the producer of around 150 Communion Cups, mainly in 1575-6, besides secular plate and top quality spoons. He made a sizeable fortune: his grandson John Bridgeman became a Bishop, his great-grandson Sir Orlando a prominent Judge, and his descendants Earls of Bradford. So Nicholas Reeve had a first-class training in all-round craftsmanship, but what became of him? The Exeter records contain no further mention of him, so he must have gone elsewhere or died before he could make a career for himself.

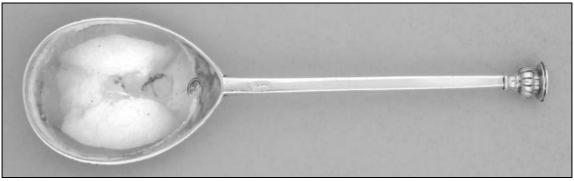

Fig. 1

This remained the position for many years, a single-line entry in my archives. Then, several years ago, my attention was drawn to a Tigerware jug with mounts of silver-gilt, of the type popular in the West Country during the 16th century on account of their moderate cost. The cover was missing, but under the foot it was clearly marked 'N.REVE' in typical regional style. So Nicholas must have enjoyed a working life, but where? Next, the spoon illustrated here came my way (thanks to Julia Bourdon-Smith). An attractive little Elizabethan seal-top, 6.4" (16.5cm) in length, of nice quality and patination (Fig. 1), the very unusual finial engraved with a Tudor rose and probably original gilding (Fig. 2), struck on back of stem with maker's mark 'N.REVE' (Fig. 3), and in bowl with pelleted circle enclosing a human face or skull (Fig. 4). This spoon can reasonably be dated circa 1590. The bowl mark is of great interest, as it would appear to be the same as that shown in Jackson, page 322, first line, accompanied by a full-name punch 'GARET'. This man is Osmund Garrett of Taunton, dealt with by the London Wardens during their 1571 search, when he was 'bound for his true workmanship' in the sum of £10. He was related to other Taunton goldsmiths of this family and was the residuary legatee of John Garrett (d.1559). Osmund was buried at St Mary's, Taunton, on 15th October 1596. It would seem likely, therefore, that there was a workshop connection between Nicholas Reeve and Osmund Garrett.

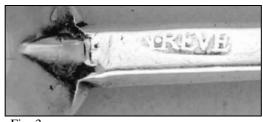

Fig. 3

The final development in this saga was the discovery, with Robert Barker's help, of Nicholas Reeve's will, (see below) dated 1st September 1601. It is worth setting this out in full, as it gives a realistic impression of what a small provincial goldsmith of the period had to leave. Not a rich man, unlike his old master John Jones, but with some useful cash assets tucked away, possibly including a few shillings profit on our spoon. We do not, of course, know what Reeve's other assets were. The London bond brought the will within the jurisdiction of the Prerogative Court of Canterbury. Further research may establish a connection with the Reeve family of Bath, where George was a family name.

Fig. 2

Fig. 4

'In the name of God amen I Nicholas Reaves of Tawnton in Somersetshire Goldsmithe beinge at this time visited with sicknes and yet in perfect memorie thankes be given to God for certiane considerations I make this my last will and testament in manner and forme followinge First and formost I give and bequeathe my soule into the handes of Almighty God my maker and redeemer and my bodie to be buried as the place doeth require item whereas there is due to me by obligation the second daie of Februarie next after the date hereof the summe of Twentie poundes of lawfull monie of Englande by John Hare my sonne in law the which bonde I have left in truste to keepe in the handes of one John Preston dwellinge in Blackhorse Alley in Fleet Streete nere the Cittie of London out of the which bonde of twentie poundes I give and bequeath unto the aforesaid John Preston the some of fortie shillings Allso out of the same bonde I give and bequeathe unto my sone in law Andrew Martine stockman and Elizabeth his wife the some of tenn poundes and the other eight poundes I give and bequeath unto my wife Elizabeth Reeves Allso I have resting in the handes of one Richard God in the mannor of Cheddonne in Somersettshire husbandman certaine obligations due unto me Nicholas Reeves unto the some of three score poundes principall monie due the second of Februarie next the which bondes are well knowne to my wife which saide bondes of three score poundes I give and bequeathe allsoe unto my wife Elizabeth Reeves Also I have lefte in the handes of one Mr Tilney my Attorney in lawe one bonde of Five poundes which he doth sue for me due to me by Jerom Halton the whiche bonde I bequeath also unto my wife whome I make my full and sole executor I give also unto the children of George Hare my wife's sonne the some of thirtene poundes of lawfull monie of England The rest and residue of all my goodes chattels monies or else whatsoever my legacies and debts beinge paide I give unto my saide wife Elizabeth Reeves the wych I have made my full and sole Executor aforesaid And if it happen my said wife to die before this will come to her handes daie of September one thousande six hundred and one Witnesses of this will and testament John Sadler at this present Commander of the Pressilla of London per me Richard Thornton Master of the abovesaid ship and John Fitzwilliams'. Proved in P.C.C., London 8th May (PROB 11/99).

I am, once again, indebted to Robyn Mercer of J H Bourdon-Smith Ltd for her help with text and photographs.

Cutlers – Ephraim & John How

By Bill Brown

This is a story about two cutlers, father and son, and an ancient mill site in the village of Southend, Lewisham, London. Ephraim How, born 1660, and John his son, born 1684, of farming stock from Crishall in Essex, set up shop as cutlers in Saffron Hill at the sign of the Blue Boar, Holborn, London, parallel to Hatton Garden. Both were members of the Cutlers' Company of London and had their own marks. Ephraim's a Heart & Crown, John's a Spade & Crown. John worked mostly under his father's mark.

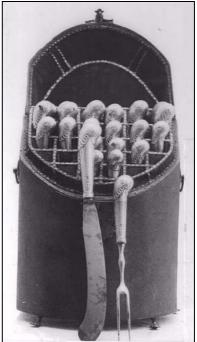

Fig. 1, a selection of How blades.

Fig. 2

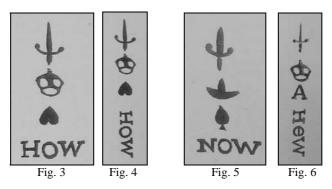

In 1686 (March 27) Ephraim How was charged by the Company with carrying on the greatest part of his work at Chingford Mills (this must mean the forging). He was also charged with striking several marks. He was not alone in the last offence. How and other cutlers were ordered by the Court (May 26) 'to strike but one mark apiece' (Figs. 3 & 4). There appears to be no physical evidence for How at Chingford Mills, but it must be around 1700 as on the date that he established himself at Southend, Lewisham, on the River Ravensbourne at an existing mill (an ancient Doomsday site).

This was a period of social and domestic change. The introduction of dining tables & chairs, with cutlery supplied in quantity and quality meant that more were required. The knives were larger and of a lively design, kept on the sideboard in a standing box covered in black fish skin (Fig. 2), giving a very striking display.

Ephraim How and his son John were very ambitious and needed more power to fulfil growing demand. Southend water driven mill could supply this – and did. Their output was considerable. So good was their work that other cutlers tried to imitate them and their mark. Ephraim How warned his customers by an announcement in the London Gazette, May 24 1703, that his mark was being copied by lesser quality cutlers using a Spade and Crown with the name 'Now' (Fig. 5).

There is another with a mark bearing a close resemblance to the 'How' mark. This is the word 'Hew' with a lower case 'e' and a capital 'A' under a Crown and Dagger (Fig. 6), perhaps by a London cutler but when imperfectly struck could be mistaken for a 'How' mark.

Ephraim How died in 1720 aged 60 years old, a famous entrepreneur leaving a thriving and prosperous business and a rich family. He left everything to his son John who was already managing the mill. The Hows had a good life style in Southend.

A rare print shows the mill area as a decorative and romantic garden with a Pagoda on an island. John died in 1736 aged 52 years and was buried with his father, at St Mary's Lewisham. The tomb (Fig. 7) now had an inscription 'that the art of cutlery was improved and carried on to the greatest perfection by the above named Ephraim and John How'. John had a son, Ephraim but he was born a deaf mute. The mill was passed on to him but managed by his brother-in-law Robert Cole who had married his sister Mary. Robert Cole died in 1768.

Fig. 7

The cutlery work at the mill ceased after about 60 years. The mill was let to a Mr Batey for milling mustard and the cutlery business at Saffron Hill sold to Paul Savigny. In 1970, passing Peter Pan's pool and playground on the River Ravensbourne, I noticed building machinery on the site for LCC flood prevention work to culvert the Ravensbourne. They dammed the river and drained the pond. The deep mud exposed prams, bicycles, bedsteads. With the mud taken away I thought I might find some 'How' relics. Permission to search the site was not given, however, they might look the other way, as long as I kept out of way of machinery. I did not have hopes of finding anything but primed the workmen what to look for as they moved along the mill race.

A few knife blades came up from the race bed and the workmen found some bolsters as they were 'up stream'. I assumed that they had been thrown there (almost three hundred years ago) by apprentices. The JCBs were filling up the trucks fast, so I told the workmen I would pay them £1 for every piece of related metal and I was searching about in between truckloads. I thought it clever to go where the trucks were dumping the loads but the deposits were from numerous other sites.

The result of a bomb in 1942 was exposed. The machinery of the waterwheel that survived to that date was smashed and dispersed; however in 1970 the axle of the wheel was still there in situ. I had tried to get help but failed. Everyone was busy. I was inexperienced without credentials and as a result received no help. Marks on a wall indicated the water wheel was 16ft diameter and was a 'breast' wheel. The contractors said they would hold the axis and spandrels plus some gearing, which had teeth of lignum vitae, for two days after which they would scrap them; as I could not find anybody to take them, they were scrapped. It was not possible to determine whether the machinery was related to the 'How' period but it showed a very busy site and the foundations were complicated and old.

The base of the inner wall of the cottage was clearly marked, but the remainder is under the A21 road. John How took over the lease of this cottage in 1718, possibly as a residence for some of his workmen. It seems that the Hows ran a factory system with a local resident workforce, listed from parish records, 1711 - 1741.

No knife hafts were found, suggesting that they were not made here but were fitted elsewhere, probably Saffron Hill. On the north side of the mill, Southend Lane, was a house called Smelts. This was the residence of the How family, later turned into an inn, and has been rebuilt several times as the Tiger's Head. The mill site has now been levelled, the Ravensbourne tamed and the millrace controlled and culverted. The area that was an early industrial site became a playground for children and families; a nature reserve for some is now a car park for Homebase!

A Channel Islands Discovery

By Michael Baggott

The earliest known spoon to have a Channel Islands provenance is an unmarked Seal-top dated to circa 1610 found in the garden wall of a house in St Saviour¹. There is then quite a gap with no recorded Apostle, Slip-top or Puritan examples to be found, the earliest known marked examples therefore being in the Trefid pattern and dating the end of the seventeenth century.

One of the first working Goldsmiths for whom marks are recorded is Robert Barbedor, probably the son of a Parisian Goldsmith, who it is assumed worked both on Guernsey and Jersey (c.1677-1704), though the majority of pieces by him are to be found in Jersey (eleven) with only a pair of overstruck London marked wine cups of 1698 in the Forest Church in Guernsey². Only some thirteen pieces are known bearing the marks of Barbedor but another very interesting example can be added to that group below (Fig. 1).

Feedback

Simon Moore sends in some feedback: In reply to David Whitbread's question about fixings for finials of early spoons The Finial, Mar/Apr '12, page 9). I used to be a Thames mudlark in the late 70s and early 80s and this was responsible for my acquired knowledge and acquisition of early eating and pocket knives. Base metal spoons also turned up in varying states of distortion and, even more occasionally, complete silver ones or parts of them.

This included a lion sejant (left), a warrior (centre) with the shield of the Painter-Stainers' Company (I recall a fine set of spoons with these warrior finials was sold by Christies in the 1960s) and a late Elizabethan seal (right). In the latter two instances you can see the V-shaped peg at the base of the finial, especially for the seal where it was still attached to the stem by a thread and which parted company presumably whilst being rinsed in the Thames to rid it of the mud!

One could therefore assume that a bridging piece of silver was inserted and soldered into the base, filed into shape and then soldered into the end of the handle or stele. The v-notch might well form a physically stronger join than the lap and scarf joints?

Tim Kent writes: I have been looking at the contents of Volume 22/04 for March/April of this year and have found a lot of interesting reading in it. As far as David Whitbread's questions on page 9 are concerned, he is certainly correct about the normal method of applying finials to London or provincial spoons. However one cannot be dogmatic as if a goldsmith in the provinces had served an apprenticeship in London he would not unnaturally have learnt to affix his finials in the London manner. I know of numerous examples of this.

As far as the finial that he shows is concerned I would not be satisfied about this without seeing it, as it appears quite likely to be a dud of later provenance. Many such finials were produced around about 1900. However it would be interesting to see whether the stem of this spoon has traces of a v-joint or lap joint. It was not unusual for London made seal-top spoons to have their seals replaced by apostles during the 1630's. I have seen a number of such spoons carrying apostles that are obviously of Salisbury make. It would be perfectly reasonable for somebody to get tired of his ordinary seal top and want an apostle put onto it. In such a case the seal top would probably be sawn off and the new apostle merely soldered on.

To sum up I would really need to see this whole spoon as of course the fact that it was turned up by a metal detector does not tell us how long it had been in the ground. I hope these comments will help.

Turning to Piers Percival's comments on page 11, I think one needs to bear in mind the fact that a crescent is also a 'C'. I believe that William Cawdell's mark is to be interpreted as 'C' enclosing 'W' rather than 'W' with crescent. The same applies to a number of other goldsmiths, specialist spoon makers, whose surnames begin with a 'C', e.g. Martin Cottrell and James Cluatt. In these cases I remain satisfied that it is a 'C' rather than a crescent with which we are concerned. Whereas Piers and I are agreed on many matters I do not agree with him about Thomas Lawrence because in my experience makers never used the first initial of a Christian name as their mark. In my experience it was always the initial of a surname. Consequently we may well be looking for a goldsmith whose initials were 'TC' or merely 'T' (first letter of surname) accompanied by a crescent. Of course the lettering does indeed sometimes involve a crescent rather than a 'C' as witness the widespread spoon maker's mark of a Crescent enclosing a mullett.

The matter is therefore not quite so straightforward as might be imagined. I hope these comments will be of assistance.

-0-0-0-0-0-

Christopher Langdon offers a couple of comments: I have purchased a number of small items made by Simon Beer whose wares are hallmarked in Sheffield. Recently he has been including a mark for his hometown of Lewes and I attach photographs of a tumbler cup (showing all the marks) and a spoon where the remaining marks are on the back.

Caveat Emptor by Richard Turner (The Finial, Mar/Apr '12, page 8 & 9) was a most informative read. But I wonder if he could amplify his conclusion that he was left with 'a mere 35gms of scrap'. What was wrong or illegal with the repair? I have a few items, which have been repaired. In general terms the more discrete the repair, the happier I am with the piece! I thought the problem arose where the marks were either forged or not original with the piece. Incidentally, I have six 1788 Newcastle table forks which I bought from a reputable source some twenty years ago. I have long suspected that they are fakes and would willingly leave them at the shop for Richard Turner to examine forensically - but please subject to an undertaking to return them and not to send them to the Assay office for defacing!

Michael Bodden responds: I would like to thank Luke Schrager and Tim Kent for their respective replies (The Finial, Mar/Apr '12, page 12) to my short piece in the preceding issue. I shall certainly take a fresh look at Crossley. I was looking through 21st Century consumer eyes instead of realising that the 18th Century customer commissioned what was required, as both respondents pointed out. I have followed Tim Kent's advice and am looking forward to reading the full story.

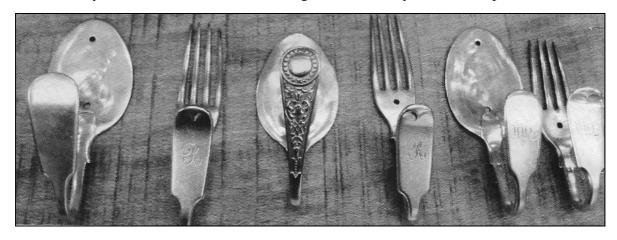

Maurice Hewitt responds to Walter Brown's article 'What Was It For', The Finial, Jan/Feb 2012, page 8: It is purely a guess since I have no certain knowledge, but I suggest this unusual salt spoon was designed to sieve out larger lumps of salt in the days when salt came in cones or blocks and had to be broken up in the household.

(It could also be used for scooping and then sifting spice, such as cayenne – Ed.).

Gavin Pittaway, new member, remarks: Thanks for your prompt despatch of my first read of The Finial. I found out about the Silver Spoon Club from my second and current Antiques course with the Regent Academy. With the Finial I like the way it looks further with understanding hallmarks history. I am building an antiques career from scratch. I love it and look forward to perhaps taking part in the spoon auction.

Gareth Marken emails a note: I also wanted to let you know a point of interest, in case you or others may be interested. On Lot 132 in the Postal Auction of the last issue there is what I thought was an unusual crest, a stylised bull's head and flags. I think in late 2011 I actually submitted to the Finial a teaspoon with the identical crest but on a spoon of a rather later date, circa 1911 from recollection, of a different pattern, Fiddle Reed & Ribbon, and was intrigued that the same crest would turn up on an item of different design and date. Same family, different generation, different style of flatware? Anyway I thought it was interesting.

Bruce Jones encloses a page from The Financial Times of Saturday's, 21st April 2012, 'How To Spend It' magazine: The page, by Lucia van der Post, who is entertainingly described as 'the grande dame of luxury'. One of the items she considers luxurious this week is so called 'silver cutlery hooks' which are in fact bent spoons and forks, pierced to allow them to be mounted on the wall. While we may applaud the concept of recycling worn out cutlery, Finial readers might regard as vandalism this conversion of what looks from the illustration provided to be perfectly serviceable items. Still, what some might regard as unattractive, others apparently may regard as luxurious, as in "Don't throw your coat over the banisters, hang it on one of my bent silver spoon hooks".

Lot Description

Complete set of 12 George II silver naturalistic pattern teaspoons, mote spoon & sugar nips in contemporary shagreen box, circa 1740, un-marked. L-11cm; W-260g. ~ An extremely rare set; this naturalistic design is not typical to the ones that are generally seen and are far better quality and detailed than the norm, therefore probably made by a Huguenot silversmith (and who knows, possibly Paul de Lamerie!) but we will not know unless you can discover a marked example elsewhere; box probably not original; the colour and condition of the pieces are superb; a wonderful set and even on its own, the mote spoon is seriously rare! £2500-3500.

£1800

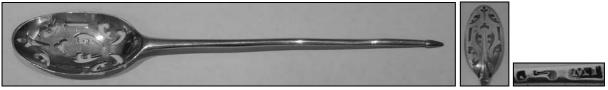

106. **Set** of **6 George II** silver **Chinaman Mask-back** Hanoverian pattern **teaspoons**, London c.1750 by William Cripps. L-12cm; W-70g. ~ A rare and unusual set of picture backs; very slight wear to pictures but all easily visible, excellent colour, bowls, marks and condition. Est. £1200-1500.

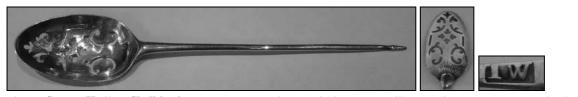

<u>Lot</u> <u>Description</u> <u>Reserve</u>

107. **George I** silver **Hanoverian Rattail** pattern **dessert spoon**, London 1715 by **Paul de Lamerie**, in a Georgian leather spoon box. L-16.9cm; W-39g. ~ note the typical long Lamerie rattail, good colour, bowl, marks and condition, a very pleasing example & something to eat the corn flakes with, occasionally! Est. £1200-1600. £1200

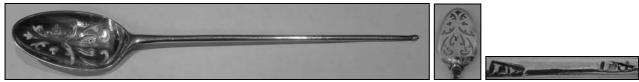

The following 10 Lots is a collection of mote spoons that spans the career of James Wilkes and illustrates the changes of fashion/piercing of the mote spoon. This collection was written about in The Finial back in Dec/Jan/Feb 2003/04, vol. 14/03.

The next Club Postal Auction will take place on Thursday 9th August 2012

Members are invited to submit their Lots (max. 10 & No 'Job Lots' please) for the next postal auction by posting or delivering by hand up until the **21**st **June**. Please provide <u>clearly</u> a full and comprehensive description, if possible, of your various lots, remembering to note all relevant facts such as makers, dates and interesting features etc. and reserve. Also please clearly state your **name**, address and telephone number. Please never intentionally submit repaired, damaged, burnished or mediocre items, as such will not sell.

-0-0-0-0-0-

POSTAL AUCTION INFORMATION

Your written, email or faxed bids should be with us, please, by no later than 12.00pm, on the day of the sale. Please note that purchase prices are subject to a 10% buyers premium (plus VAT on the commission) and £6.00 for postage & packing per consignment.

Members are welcome to come to view the lots on offer at 26 Burlington Arcade, London.

Bidding

The Lot is offered to the top bidder on approval, at a figure that is 50% the difference between that bid and the under bid. Or where only one bid is received, at 50% the difference between that figure and the reserve. Should two or more members submit an identical top bid the Lot is offered to the member whose bid was received first, at that price. The Lot will be sent to you for approval where you can decide to either purchase or return the Lot.

When submitting your bid(s) please make sure you clearly state the Lot number, a brief description, your bid (excluding premium), name & address and a telephone or fax number.

If you are successful we will telephone you on the day of the sale from 6pm to confirm your purchase(s) and at what price. Also to confirm that someone will be at home the following Thursday morning, to receive the lot(s), sent by guaranteed delivery.

We request payment within 48 hours of your receiving the lot(s), or their immediate return (together with a refund of the postal and packaging charges (£7.50) incurred in the failed transaction) should you decide not to take up your option to purchase.

Overseas Based Bidders

- If successful, we will notify you by fax or email.
- Please note that Lots are not dispatched until payment in Sterling has been received, also that postage/packing is charged at £15.00 per package regardless of weight or destination.
- Although every assistance will be provided to trace missing packages, please note that our responsibility ends once a package leaves the United Kingdom.

Vendors

All members are invited to enter Lots (max. 10) for the Silver Spoon Club Postal Auction.

- Commission is charged at 10% (minimum £2.50) & £2.50 per unsold Lot plus VAT of the sale price.
- Vendors are paid when we have received payment; please note that there may be a delay in settlement where lots have been purchased by overseas members, or where a lot has been rejected by a U.K. member thus necessitating a further offer to an under bidder.
- Items for which no bids have been received will be posted back to you, and charged £7.50 for postage & packaging.

General Information

- The Auction results will be printed in the next Finial.
- All measurements are approximate.
- The Silver Spoon Club holds no responsibility for description. All purchasers must satisfy themselves on their lot(s) prior to payment.
- Members participating in the auction are deemed to have accepted that we are not to be held personally responsible for any losses incurred by members, for whatsoever reason.
